Hello, summer!

The Center has been busy all spring, welcoming the return of some of our favorite programs (like CAUSE Excursion and field trips in the field!) and launching engaging, educational new programming. Look for details on how to join us in this newsletter.

AQUATIC
SCIENCES
at Adventure Aquarium

Summer Sea Camp 2022

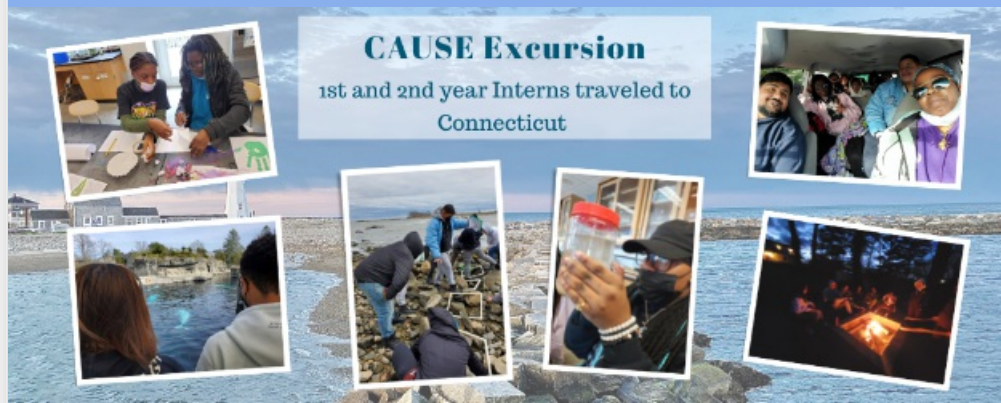

We're back! Bigger and better than ever. More weeks, more opportunities, and more adventures are coming your way this summer!

There are still a few spaces remaining in Small Fry (1/2 day, ages 4-6), Ocean Explorer (ages 7-10), and Junior Marine Biologists (ages 11-14).

Library Programs

Look for us at your local library! Center educators and animal ambassadors will be road tripping this summer, to bring cool programs to libraries all over the region. Check your library's calendar!

CAUSE Excursion

1st and 2nd year Interns traveled to Connecticut

First stop: **Mystic Aquarium!** CAUSE students had the chance to see how another aquarium operates, enjoyed spending some time with the **beluga whales**, and experienced a **seal training** demo.

CAUSE next visited **Project Oceanology** in Groton, CT, where they participated in **plankton sampling**, then practiced Gyotaku, the Japanese art of **fish painting**. CAUSE conducted a **Rocky Intertidal Zone Intersect field survey**, recording many organisms including crabs, algae, and clams.

Finally, CAUSE students visited **Ragged Mountain Preserve** where they hiked through wooded terrain and sampled **macroinvertebrates** in multiple streams along the way. CAUSE made memories sitting around the fire pit at night and laughing during the long van rides. **It was an amazing Excursion!**
