

BACK TO NATURE

Bubbles

Making bubbles is good, clean fun.

First you will need to make your **bubble solution**.

What you will need:
3 cups water
1 cup liquid dish soap
1/2 cup glycerin or corn syrup

Mix ingredients together. It's best to let your bubble solution sit for a day or two.

You will need **bubble wands** for making your bubbles. No bubble wand? No problem! Anything with holes/slots can work. Or make your own wand with wire, pipe cleaners or straws/string.

You can make bubbles with a reusable straw.

Place your straw into the bubble solution and blow. Just be careful—don't inhale the solution!!

Make Bubble Art.....

Place a piece of white construction paper onto a tray. Fill several small (8oz.) cups with your bubble solution and add a few drops of craft paint to each. Place a cup on the paper and make bubbles with a straw until they overflow. Repeat with another cup.

Find full directions [here](#).

Go Outside

Pour some bubble solution into a bowl and test your bubble wands. Dip your wand into the solution until a thin film forms. Gently blow on the film.

Which wand works the best?
Which wands make bigger bubbles?
Which wands make smaller bubbles?
Does the shape of the wand effect the shape of the bubble?

How long does a bubble last?
Do your bubbles float?
What happens when they fall to the ground?
Try holding a bubble with a dry hand.
With a wet hand. What happens?

What's inside a bubble?

Can you make a bubble with your hands?

Take a photo of your bubble creations and share on Facebook and Instagram using these hashtags:

Celebrate With Bubbles, Not Balloons!

Next time you celebrate do it with bubbles, not balloons.

When you release helium balloons, they go up, then eventually come down.

Discarded balloons pollute rivers and seriously injure wildlife.

So celebrate with **BUBBLES** instead!
